SKILL DEVELOPMENT COURSES AT St. JOHN'S

L. Dis. No.15/ St.JEMHS /2023-2024

Date : 26.07.2023

Skill Education or Vocational Education is the skill based learning process – i.e., learning things by doing or practice. It envisions imparting knowledge and skills to the students that will help them to use the acquired knowledge in real life situations. Engaging the students in skill based learning is of great importance. It makes the students confident and independent. These two qualities make students successful in life.

Focus of CBSE Skill Education Courses:

The CBSE skill education courses are designed to be practical and project-based. The focus is on experiential learning and industry exposure. Students are expected to participate in various activities like case studies, role plays, simulations, field visits, internships, etc., to develop their skills and competencies.

CBSE Skill Education Syllabus 2023-24 and Support Material:

The Central Board of Secondary Education (CBSE) has released the Curriculum for Skill Education for the Academic year 2023-24. The curriculum is designed to enhance the employability and entrepreneurship skills of the students from classes VI to XII. The CBSE offers skill education courses in various domains, such as finance, retail, communication & information technology, security, automobile technology, hospitality, handicraft, coding, and more.

The syllabus for each skill education course is available on the CBSE website and the students can access the books and support material for each course .

Assessment of CBSE Skill Education Courses:

The objective is to measure the effectiveness of the courses in terms of enhancing the employability and entrepreneurship skills of the students.

Assessment of CBSE Skill Education Courses:

The objective is to measure the effectiveness of the courses in terms of enhancing the employability and entrepreneurship skills of the students.

Our team is in a mission to provide maximum inputs to the students through the practical experience that will develop their knowledge. As a team, we think about it and starting with “CODING”.

There are lots of benefits we can get from Coding. With Coding ,as students , they can learn how to think creatively, work collaboratively, compute easily , gain self-advocacy, critical thinking, emotional intelligence and problem solving skills. It also helps young learners to understand the basic coding logic using blocks and visual aids. Additionally, Coding empowers children to become creators and innovators rather than simply consumers of technology. It also includes potential career opportunities like : Software Developer, Data Scientist, Database Administrator and Web Developer.

Certification:

Once the student has completed the course, certificate is going to be issued by the Skill Education , CBSE under the Skill India Mission. This certificate is basement of knowledge and skills. It’s a great add-on to student’s academic achievements.

Schedule :

CLASSES	DATES (12 DAYS) – Morning Session	TIMMINGS : 8a.m to 9a.m * We request the parent to arrange for conveyance to drop the child
